Glass Cloth

In many ways superior to glass for hotbeds, cold frames, chicken houses, scratch sheds, for covering window openings and for making a screen porch into a sun parlor.

It is much cheaper than glass. Lighter to handle. Does not break. Is almost as transparent as glass. Does not burn the plants in a hotbed and lets through more of the beneficial ultra-violet rays than does glass.

The cloth is a medium weight white muslin treated with a special preparation which makes it water-proof, translucent, weather-proof and long lived. It comes in one width only, 36 inches or a trifle less, and in standard size bolt of 15 yards. Can also be had in 6-yard and 10-yard bolts. Try to order these regular sizes if possible.

Special Prices—Glass Cloth

15-yard bolt (135 sq. feet) postpaid .......... $5.60
10-yard bolt (90 sq. feet) postpaid .......... 3.50
6-yard bolt (64 feet) postpaid ............ 2.25

This figures out less than 4c per square foot in full bolts, or one-fourth to one-eighth the cost of glass.

We Guarantee

All goods ordered of us to reach the purchaser safely and in good condition. If lost or damaged we will refill the order. While we exercise great care in selecting all seeds, bulbs, plants and trees, and having them reliable and true-to-name, we give no warranty, expressed or implied, as to purity or germination, and will not hold ourselves responsible for any failure thereof. If not accepted on these conditions they must be returned at once.

Archias' Missouri Pride Peach

THE WORLD'S BEST PEACH

Resembles Elberta in color and flavor, but tree is hardier; a strong grower and productive. Bears when Elberta fails. Averages one-third to one-half larger than Elberta. Round uniform shape.

Color—Rich, golden yellow, overlaid with carmine. Colors up ten days before maturity.

Flesh—Solid and meaty. Texture of a cling, yet perfect freestone. Without grain or stringiness.

This new everbearer has proven itself to be all that has been claimed for it. You have read some apparently extravagant stories about it. The results you will get from it will prove they are true. Mastodon will produce three large crops within 18 months after planting and big, fine berries, too. Try a patch this year—you will be pleasantly surprised.

Other Good Peaches

Every garden should contain a few Peaches—no fruit is more luscious and pleasing than a ripe, juicy Peach. Plant 16 feet apart; mulch in Spring.

A FEW OF THE BEST ONES

Those marked (P) are pistillate varieties. They are the most productive, but a row of (S), a staminate or perfectly formed sort, should be planted every 10 or 12 feet to pollinize the flowers.

Latham Raspberry  
(Minnesota No. 4)  
Yields Twice as Much as Other Red Raspberries  
Here is a new Red Raspberry that was originated in Minnesota and acclaimed for its hardiness in that state. During the past few years its merits have spread with its placefulness (the middle and eastern states). The high yielding ability of the Latham is due largely to its resistance to Mosaic and other Red Raspberry diseases; wherever tried, reports have been most favorable. It possesses the hardiness of “King” and produces very strong, vigorous, thornless canes; very productive. Berries are large, of highest quality, ripen evenly and hold up well throughout the season. The canes do not need covering even in severe locations. We have a fine stock of this splendid new variety and hope you will give it a thorough trial. We are sure it will prove a money-maker for you, especially in a season when other standard varieties freeze out. Each $3.00 for 40; $12.00 for $4.50; 100 for $5.00, postpaid.

To Produce a Good Lawn

Plow or dig up the surface thoroughly to a depth of 12 inches and mix the soil with well rotted manure or our Archias' Sure Lawn Fertilizer, the latter being at all times preferable, as it is more durable in its effect and free from weed seeds, which are always contained in more or less quantities in stable manure.

The soil should be well pulverized before sowing, and the lawn kept free from weeds the first season. The quantity of seed required is one pound to every 300 square feet.

Fertilizers for Farm, Lawn, Garden, Greenhouses
